

Pharos Security

The SaaS Platform for the CISO: Centrally Manage the Business and Economics of Cyber Security

Security-Economic Options for the CISO and the Board

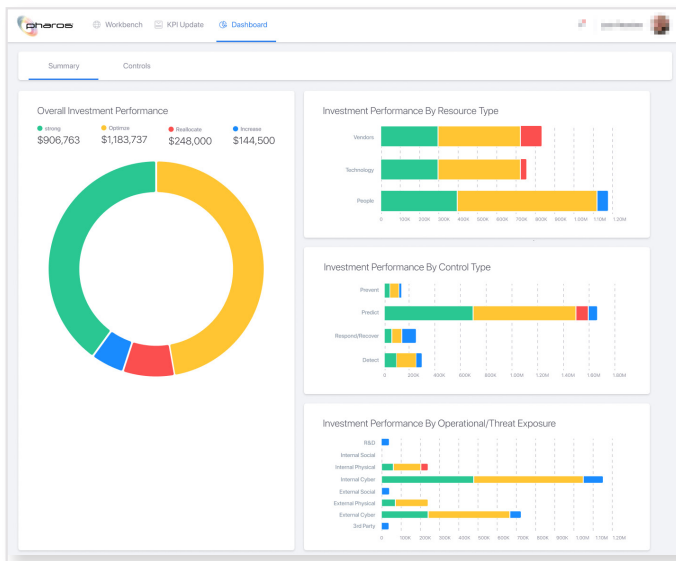

1 Get more from what you already have

2 Robustly justify an increased budget

3 Cut budget with minimal impact

- Measure and Prove the Performance of your Security Program
- Model Investment Options to Threat Preparedness Outcomes
- Track and Optimize Budget, Resources and SecOps

*“I used a **Pharos dashboard** as the **centrepiece of my board pitch** and **walked out doubling my headcount from 5 to 10**”* — [Bank CISO]

Real-time Reporting for Security and Business Management through Pharos' Threat and SecOps KPI quantification and calibration model

- Justify where you are, where you are going, and why
- Scale from quick-start to deep-dive, business unit to global ops
- Gain a snapshot and/or use for day-to-day SecOps management
- Develop data-driven insight without a pre-existing dataset

A Holistic View of Your Security Program

Quantitatively link security investment to cyber resilience across your global security program.

Guide an Informed Risk Appetite

Provide the board with clear and justified investment options against a given level of threat sophistication.

Create a Multi-year Optimization Roadmap

Deliver a multi-year strategy and business plan. Track and measure results are to plan.

Measure and Track Performance of Security Operations

Evaluate the control ecosystem providing deep measurement, analysis, and reporting, all linked to business outcomes.
