

# Pharos Security

## Cyber Security Economics: Visibility of Budget & Performance The SaaS Platform for the CISO

### Security-Economic Options for the CISO and the Board

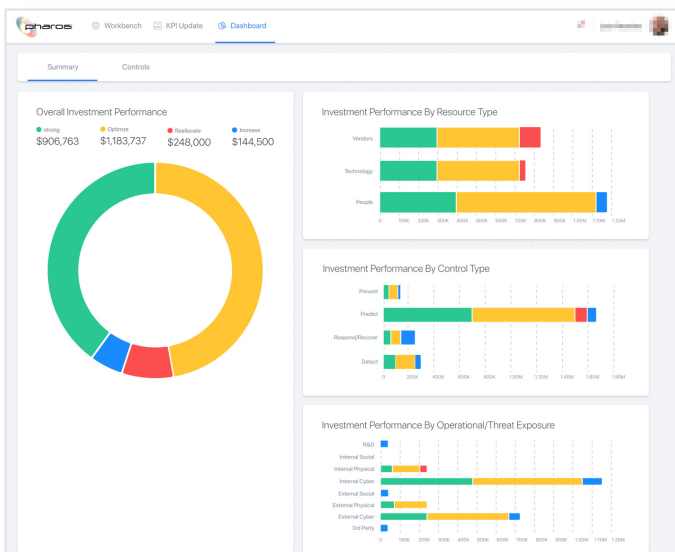

**1** Get more from what you already have

**2** Robustly justify an increased budget

**3** Cut budget with minimal impact

- Measure and Prove the Performance of your Security Program
- Model Investment Options to Threat Preparedness Outcomes
- Track and Optimize Budget, Resources and SecOps Activity
- Justify Where You Are Going and Why

### Reporting for Security and Business Management through Pharos' Threat and SecOps KPI Quantification and Calibration model

*"I used a Pharos dashboard as the **centrepiece** of my board pitch and walked out doubling my headcount"*

— [Bank CISO]

#### A Holistic View of Your Security Program

A clean view showing investment to cyber resilience across your global security program.

#### Measure and Track Performance of Security Operations

Evaluate the control ecosystem providing measurement, analysis, and reporting, all linked to business outcomes.

#### Guide an Informed Risk Appetite

Clear and justified investment options against a given level of threat sophistication.

#### Create a Multi-year Optimization Roadmap

Multi-year strategy and business plan. Track and measure in real-time.
